BERKELEY 2, CALIFORNIA

Dear Sir:

The following is our February 1946 offering of Orchid plants. A rare opportunity for the amateur grower:

Lc. Mrs. Harold Lloyd (Lc.Aphrodite x C.Van Houtte) Free flowering, vigorous grower. Flowers late winter and early spring. Good color is indicated by parents.	5" pots	15.00
	4" "	12.00
	3" "	10.00
C. Remy Chollet (C.Trianae Edgar Knight x C.Monarch) Large flowers, good shape, free bloomer for Jan. to March	5" pots	15.00
	4" "	12.00
	3" "	10.00
Lc. Mrs. Harold Lloyd x C.Remy Chollet. Cross as indicated by parents above.	5" pots	15.00
	4" "	12.00
	3" "	10.00
Bc. Akebono (Bc.Peetersiae x C.Labiata, Westonbirt) One of the freest flowering Brassocattleyas. Dark rose lip with a base of yellow is outstanding among Brassocattleyas.	6" pots	17.50
	5" "	16.00
	4" "	12.00
C. Novato (C.Labiata, Mutch x C.Gravesiana) This magnificent hybrid flowers whenever it makes up a new growth, which is frequent. Fine color.	6" pots	20.00
	5" "	18.00
Lc. Newport (C.Harold x Lc.Wellsiana) April bloomer. Deep lavender sepals and petals. Dark purple lip.	6" pots	20.00
	5" "	18.00

These are all wonderful plants, freshly potted and ready to produce fine blooms. Limited quantity available.

Prices are f.o.b. Berkeley, cash with order. California customers please include 2½% sales tax.

Yours very truly,

C. & A. WARREN

1. Securing orchid plants.
2. Watering and humidity control.
3. Shading various types of Orchid plants.
4. Potting instructions for different species.
5. Vegetative propagation - increasing plants by cuttings.
6. Insect pests and their eradication.
7. Treatment of different types of Orchids during flowering.
8. Hybridization of Orchid flowers for seed.
9. Construction of buildings for Orchid culture.
10. Heating of structures.

The first lesson will be mailed immediately upon receipt of enrollment fee and each lesson thereafter will be mailed to the student at two week intervals, subject to him having answered the five questions which are at the end of each lesson, in a manner satisfactory to the instructor. In addition, each student will be entitled to ask the instructor five questions concerning his own Orchid problems.

This course will enable both the amateur with no experience and the man with some knowledge of orchids to fulfill his desire to grow these floral aristocrats around which has been drawn a veil of mystery.

Yours very truly,

C. & A. WARREN

Following the keen interest evinced in our personal instruction classes on Orchid Culture and to fulfill the demand advanced by numerous interested persons unable to attend because of distance, we are instituting a correspondence course in this subject. The entire series of ten lessons will be conducted by Cyril Warren, who has had forty years experience in the collection, growing and merchandising of orchid plants and their flowers. The subjects will be:

1. Securing Orchid plants. Practical and initial care.
2. Watering and humidity control.
3. Shading various types of Orchid plants.
4. Potting instructions for different species.
5. Vegetative propagation - increasing plants by cuttings.
6. Insect pests and their eradication.
7. Treatment of different types of Orchids during flowering.
8. Hybridization of Orchid flowers for seed.
9. Construction of buildings for Orchid culture.
10. Heating of structures.

The first lesson will be mailed immediately upon receipt of enrollment fee and each lesson thereafter will be mailed to the student at two week intervals, subject to him having answered the five questions which are at the end of each lesson, in a manner satisfactory to the instructor. In addition, each student will be entitled to ask the instructor five questions concerning his own Orchid problems.

This course will enable both the amateur with no experience and the man with some knowledge of orchids to fulfill his desire to grow these floral aristocrats around which has been drawn a veil of mystery.

Yours very truly,

C. & A. WARREN
